- Web Developer Team Management Systems Architect

Web/Mobile Developer at E Commerce Percs

April 2006 - July 2006 (4 months)

- Mobile/Web Application Development

Projects

ZeroIN

April 2013 to Present

Members: Russell O., Yat Pan Ng

ZeroIN is the first context-aware, intelligent messaging app for the car. It uses your personal smartphone to keep email distractions to a minimum, no matter what car you're in. Only messages that are important, contain actionable content and merit attention are read out, and drivers can simply respond by voice — to keep their eyes on the road and hands on the wheel. Stay connected to what's important - ZeroIN restricts incoming messages to just those from important contacts, and then distills the content to just the parts that require your attention. Take action safely – reply to both incoming and pending action items via voice.

Recordr

December 2012 to Present

Members: Russell O., Grae Joquico

Recordr is the easiest audio/sound/voice recorder you can find. You can have the recordings automatically sync across your devices with iCloud. It even allows you to record and play in the background! Other features includes: 1. Sync files via your iTunes. 2. Share recordings via SoundCloud 3. Backup media files to your Dropbox account 4. Upload to your Google Drive™ Account 5. Send to friends via E-Mail. Recordr produces high quality recordings that can be used for interviews.

SoFAB.com.ph

September 2010 to Present

Members: Russell O., Bryan Chan, Richard G., Grae Joquico

CMG.com.ph

December 2010 to Present

Members: Russell O., Richard G., Bryan Chan, Grae Joquico

SoFAB iPad Application

January 2011 to Present

Members: Russell O., Richard G., Bryan Chan

July 1, 2014

Authors: Russell O.

Russell Ong

Senior Software Engineer - iOS at ReQall PTE LTD

5 people have recommended Russell

"It is great working with Russell! A very intuitive guy and knows where to punch and deliver codes. He seamlessly integrated Facebook with one of our big projects and cramped tons of AJAX functionality on another. On a different light, he is always eager to help and share his knowledge to others. And thirst to discover more, learn more tricks and experiment with new technology, approach, techniques and implementations."

— **Richard G.**, managed Russell at Rivereo

"Russell was a very productive person—a colleague and friend who has a "can-do" attitude. It was my pleasure working with him for 2 years with him on major business projects and was impressed with the depth of knowledge he possesses. Russell is a careful and great software engineer. Self motivated and a proactive strategist. Deliver results all the time but make no mistake, the guy knows how to have fun. That's Russell's way. I strongly recommend him."

— **Jurgen Estanislao, UXC**, *Digital Projects Manager, Thousand Minds Social Media*, worked with Russell at Brewed Concepts Inc

"Russell is a great colleague! An excellent programmer/developer who has strong dedication and appreciation in all of the projects he handle. He is full of ideas and knowledge which he always share to his co-workers. Good job! :)"

— **Darryl Anne Gutierrez**, worked directly with Russell at Brewed Concepts Inc

"Russell is a great team-player, an excellent ROR geek, fast learner and a great buddy! ;-) Keep it up!"

— **Jeremy D.**, worked directly with Russell at Brewed Concepts Inc

"Russell is unbeatable especially in programming techniques. He is self-motivated person. Also I really like the way he treated his co-worker... Just continue being YOU and keep it up!!!"

— **Jenilee S.**, worked directly with Russell at Brewed Concepts Inc
